

SHANE WINT AUNG

Bukit Merah, Singapore

+65 9887 8583 • shanewintaung@gmail.com • github.com/ShaneSWA06 • linkedin.com/in/shanewintaung

Internship Availability: 14 September 2026 – 12 February 2027

EDUCATION

Singapore Polytechnic

Singapore

Diploma in Information Technology

Apr 2024 – May 2027 (Expected)

- Enrolled in Project INC (industry track) — completed 2 real client projects across Year 2 and Year 3
- Relevant Coursework: Web Application Development, Database Management Systems, OOP, UI/UX Design, Software Engineering

PROJECT INC EXPERIENCE

Vision Screening Intranet System

Singapore Polytechnic

Team Developer | Project INC — Final Year Project (FYP)

Year 3, Sem 1 – 2026

Full Stack Developer

- Developed a full-stack intranet system to digitalise a client's paper-based vision screening workflow, independently owning the entire stack from requirements to deployment
- Conducted requirements-gathering sessions with the client and produced system diagrams to validate scope before any code was written
- Researched and proposed a zero-cost hosting architecture using Cloudflare Pages, Cloudflare Workers, and Supabase free tier — total infrastructure cost: SGD 0
- Prepared a formal cost analysis report comparing cloud hosting, laptop-hosted, and Raspberry Pi solutions to justify the recommended approach to the client
- Designed the database schema and implemented backend logic using Prisma ORM on a relational database
- **Technologies:** HTML, CSS, JavaScript, Prisma ORM, Supabase (PostgreSQL), Cloudflare Pages, Cloudflare Workers

CleoSpa — Spa Management Web Application

Singapore Polytechnic

Team Developer | Project INC — Industry-Partnered Track

Year 2, 2025

Full Stack Developer

- Worked directly with the client to gather requirements, producing use case and ER diagrams confirmed with the client before development began
- Owned the sales transactions, care packages, and member care packages modules end-to-end — covering front-end UI, back-end logic, and database schema
- Collaborated in an Agile team, self-assigning modules and coordinating through regular check-ins and Git for version control
- Delivered a spa management web app with a client-facing booking flow and admin dashboard; presented to faculty and stakeholders with justification for every design decision

WORK EXPERIENCE

Shangri-La Hotel | voco Hotels

Singapore

Banquet Server & Buffet Waiter — Part-Time

Jan 2025 – Present

- Managed up to 8 tables per shift in a 6-person team across large-scale corporate events and weddings
- Coordinated with kitchen staff to maintain buffet stations and ensure uninterrupted service throughout events
- Consistently handled high-pressure, fast-paced environments requiring real-time problem-solving and clear communication

PERSONAL PROJECTS

Iarlarbook — Mobile App (React Native)

Sole Developer (In Progress)

2026 – Present

Mobile Developer | UI/UX Designer

- Building a Burmese digital library mobile app in Expo (React Native) — 5 tab screens (Home, Library, Search, Write, Profile) plus an in-app EPUB reader
- Implementing screens pixel-accurately from a 73-screen Figma design created by the team, covering every key user flow: onboarding, book discovery, purchase, reading progress, and author pages
- Contributed to the UI/UX design process in Figma — view the full mobile design prototype: <https://www.figma.com/design/fb74B6Rgxy1uKbXtL9170d/LrLr-Books-App-Mobile?node-id=1171-103&t=5qp9fu9xk0DvoAM1-1>
- **Technologies:** TypeScript, Expo, React Native, Expo Router, Supabase, react-native-reanimated, epubjs-react-native

KBZPay Transaction Tracker

Sole Developer

2024 – Feb 2026

Full Stack Developer

- Built a web app to replace manual transaction recording at a family business in Myanmar, where cashiers previously tracked every KBZPay transaction by hand in a notebook
- Deployed as a Progressive Web App (PWA) so cashiers could install it directly from Chrome to their phone home screen without an app store — enabling one-tap access on any device
- Automated daily profit calculations, replacing the previous manual process of totalling all transactions with a calculator at the end of each day
- Integrated Google Gemini API for OCR — cashiers can photograph a KBZPay receipt and the app automatically reads and fills in the transaction details, reducing manual entry
- **Technologies:** JavaScript, TypeScript, Prisma ORM, Neon DB, Google Gemini API — deployed on Render

Grocery Store Inventory App

Sole Developer (In Progress)

Mar 2026 – Present

Full Stack Developer

- Building a cloud-hosted inventory system for a family grocery store in Myanmar, enabling cashiers to look up sell prices across 1,000+ items in real time without relying on the store owner
- Architected for remote management — the store owner updates item prices from Singapore and changes are immediately reflected at the counter in Myanmar
- Implemented barcode support; for items without barcodes, generated and assigned custom barcodes manually to ensure every item is scannable
- **Technologies:** JavaScript, TypeScript, Prisma ORM, Supabase (PostgreSQL) — hosted on Cloudflare

SKILLS & LANGUAGES

Languages: JavaScript, TypeScript, Java, HTML, CSS

Frameworks & Libraries: Node.js, Express.js, React.js, React Native, Expo, Tailwind CSS, Bootstrap, Framer Motion

Databases & ORM: MySQL, SQLite, PostgreSQL, Prisma ORM, Neon DB, Supabase

Tools & Cloud: Git, GitHub, VS Code, Figma, Cloudflare Pages, Cloudflare Workers, Render, Vercel

UI/UX & Design: Figma (mobile & web design, component systems, prototyping), UI/UX Design principles, Responsive Design

AI & APIs: Google Gemini API (OCR / Vision)

Soft Skills: Client communication, requirements gathering, system diagramming, Agile collaboration, remote cross-country coordination

Spoken Languages: English (Fluent), Chinese (Intermediate), Burmese (Native)
